---

Smart Doctor Appointment System

---

Name: Tapaswi Kandrikar

Roll No :196

Project Guide : Mrs. Bhagyashree Patil

# OFFER LETTER

# INTRODUCTION

---

MediConnect is a web-based healthcare system designed to simplify the process of booking doctor appointments.

- It connects patients and doctors through a centralized platform.
- Patients can easily find doctors and book appointments online.
- Doctors can manage and update appointment status efficiently.
- The system reduces manual work and improves accessibility to healthcare services.

# OBJECTIVE OF THE PROJECT

---

- To provide an easy and user-friendly platform for booking doctor appointments
- To reduce manual effort and waiting time in hospitals
- To enable doctors to manage appointments efficiently
- To maintain accurate and organized patient and appointment data
- To ensure better communication between patients and doctors

# SCOPE OF THE PROJECT

---

## **Current Scope:**

- Online appointment booking system
- Appointment status tracking (Pending / Approved / Cancelled/Complete)
- Doctor dashboard for managing appointments
- Admin panel for system control

## **Future Scope:**

- Online payment integration
- Email/SMS notifications
- Video consultation feature

# MODULE SPECIFICATION

---

## **Patient Module**

- View doctor specializations
- View list of available doctors
- Book appointment (date & time selection)
- Check appointment status using appointment number

## **Admin Module**

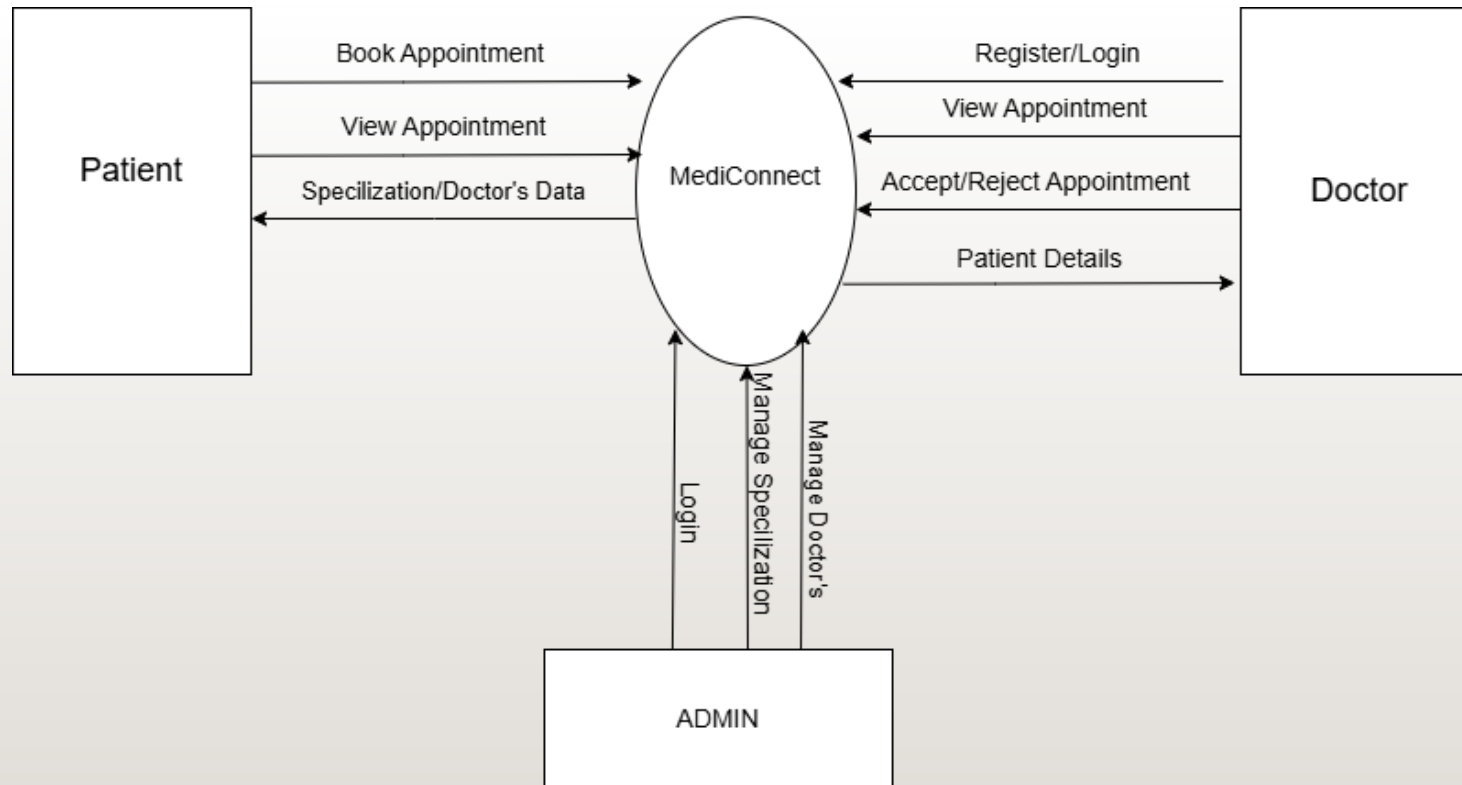

- Secure login
- Manage doctors, specialization, appointment

## **Doctor Module**

- Secure login/Register
- Dashboard view
- View appointments
- Change status of appointments
- Update profile

# APPOINTMENT TABLE

[illegible]

# DOCTOR TABLE

[illegible]

# SPECIALIZATION TABLE

The screenshot shows a database query editor interface. At the top, there's a toolbar with various icons for file operations, editing, and viewing. Below the toolbar, a SQL query is entered in a text area:

```
1 • select * from specializations;  
2  
3
```

Below the query editor, there's a section labeled "Result Grid". It includes a "Filter Rows:" input field, an "Edit:" button with a pencil icon, and an "Export/Import:" button with a document icon. To the right of these buttons is a "Wrap Cell Content:" checkbox. The main part of the result grid displays a table with three columns: "id", "name", and "description". The table contains 12 rows of data, each representing a medical specialization.

|   | id | name              | description                                          |
